

Memo 5

To: Dr. E James Nelson, Dr. Javier Clausen, Dr. Jose De Anda, Jesus Gabriel Rangel, Eduardo Parra

From: Oliver Obregón, Edith Lugo, Rushit Hila

Date: 2/23/2008

Re: Weekly memo 5

This week we finished the meteorological file for the Aguamilpa model, we used daily data for one year. We checked the bathymetry and control files generated on WMS, we are had to change a few values and codes that were not consistent. We will continue working on the bathymetry and control files for the next week.

Also, we did some research regarding our assignment for the logistics of the team. Please let us know if you have any suggestions or questions about the project. We will like to hear you opinion.

Have a good week.

Edith, Rushit and Oliver
